

XM Instant Traffic and Weather is an outstanding service. I'm planning on driving to the Los Angeles and Orange County. During that visit I'm looking forward to monitoring XM channel 222. As I listen to XM 222; I'm amazed at how accurately all of the freeways are covered. Information is constantly updated...very impressive!

I've also talked to commercial drivers that depend on XM Instant Traffic and Weather to safely navigate through many highly populated cities in our country. Trucks move this country's commerce and XM [or satellite radio] helps that process move safely.

Satellite radio is helping us safely move into the 21st century.
